

WHAT TO EXPECT FOR THE FIRST HYDROTHERAPY ASSESSMENT

A FULL MUSCULOSKELETAL ASSESSMENT WILL BE PERFORMED

During this we assess your pets':

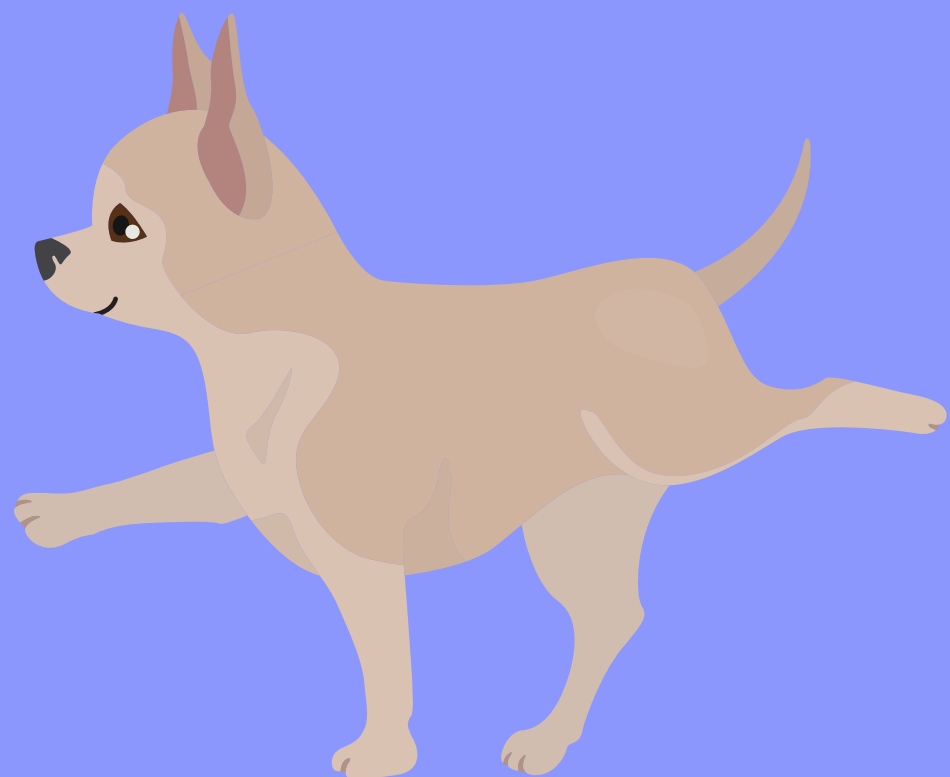

- Conformation and posture
- How they move
- Muscular condition
- Joint range of motion

TREADMILL ACCCLIMITISATION

Your pet will be fitted with a harness and will be provided extra support should they need it.

We will then wash them down and start the acclimation process to ensure they are confident and happy within the treadmill.

EXERCISE

The speed and water depth is personalised to your animal and the therapist has full control throughout the entire process. Your dog will then have stints of walking followed by rest breaks where they will receive manual therapy i.e. massage

BOOK YOUR NEXT APPOINTMENT AND HOME TIME

After your pet comes out of the treadmill we will wash them down and dry them before they go home. You will also be asked when you would like to book in for your next session. If discussed during the session any additional resources will be sent out to you.
